REF: B.M.M.I.

To Whom It May Concern:

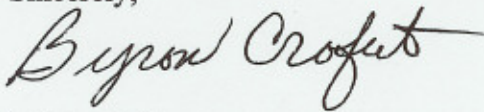

I recently hired B.M.M.I. to provide the masonry and concrete work for my new house. The job included all the footer, slab, beam and block work. And I chose to use insulated concrete form walls ("I.C.F.") as well as traditional block.

I have taken the time to write this letter because I would like you to know what a pleasure it was to deal with people and a company who are truly dedicated to good old-fashioned quality and service. I felt like I was their only customer.

The build went quickly and smoothly, mainly because the foreman really knew his stuff. But speed did not come at the expense of quality; the workmanship was first class in every respect. And the attention to detail was impressive - even to me! The crew worked quietly and efficiently and were respectful of my property at all times.

If you need concrete and masonry work for your next building, I urge you to use BMMI. I'm sure you will be glad you did.

Sincerely,

Byron Crofut
